UNDERSTANDING WHEN SOMETHING SMALL LEADS TO SOMETHING BIG

early warning signs of childhood cancer

- Are headaches and early-morning vomiting a common event?
- Can you see a whitish colour behind your child’s pupil?
- Is nausea a problem or even vomiting without nausea?
- Is your little one constantly tired and noticeably pale?
- Is your child loosing weight for some unknown reason?
- Are there excessive bruises, bleeding or rashes?
- Are recurring fevers a problem and you just don’t know why?
- Has your child’s vision changed suddenly?
- Are infections a continuous problem?
- Have you noticed a lump on the tummy, neck, chest, groin or armpits?
- Is there swelling and persistent pain in your little one’s bones, joints, back or legs?
